

Here comes an exciting newest solution for your increasing storage needs, the MICRO-FLASH, the latest format of external mass storage that plugs into your USB port. With MICRODIA's unique Chipset-Solution Design and IC Packaging Technology, the MICRO-FLASH does not require fussy driver installation for PC or MAC operating systems, just Plug-&-Play to your USB port. With its built-in Security Feature, you can partition and password-protect your data, and with its built-in Bootable Function, you can boot up your computer without a floppy drive.

MICRO-FLASH

FEATURES

- Exceptionally Stylish, made with Aluminum Housing for extra durability
- Tiny, thin enough not to block another USB Socket
- Practical, functions virtually as an external hard drive with incredible high capacity
- Security, password protects your data against unauthorized access
- Convenient, bootable function acts like a bootable disk with high portability
- Aluminum housing: Made to sustain tough & rugged environments
- High Capacity available based on leading-edge IC Packaging Technology
